

## THIS IS FULLY SETTINGS PAGE

1. In the Bottom Navigation panel, instead of "More" we shall change as "Settings"

2. Under the Settings menu,

lets have the below tile, like now - add company name in the tile.

### ***Profile Settings***

- Personal Information (like edit name)
- Permissions
- Bank

### ***Category Master***

- Production Expenses
  - Chicks
  - Feed
  - Medicine
  - Vaccine
  - Labor
  - Others
- Farmer Expenses
  - Coco Pith
  - Electricity
  - Labor
  - Medicine
  - Water
  - Maintenance

- Others
- Office Expenses
  - Stationeries
  - Salary
  - Rent
  - Others

## ***Item Master***

Category selected first, under that items are added. (for now only production expenses has item) when farmer or office expense selected, no item field displayed.

- Feed
  - Pre Starter
  - Starter
  - Finisher
- Medicine
  - Toxol
  - Kohrsolin
  - Vash
  - Electro care
  - Others
- Vaccine
  - La Sota
  - IBD
  - CRD
  - Others
- Labor
  - Vaccinator
  - Others

## ***Users***

Create - Owner, Accounts, Supervisor, Farmer along with permissions and active/inactive

## ***Partners***

Create Vendors, traders

## ***App Settings***

- Security
  - Change Password
  - Change Pin
  - BioMetric (toggle)
- Payout rules
  - Based in KG sold or Production Cost
- Alerts
  - Pending entry
  - FCR
  - Mortality
- Financial Control
  - Supervisor can add Farmer Expense
  - Farmer Expense requires approval

When expense approved by admin/owner, that should be added as credit while the batch settlement is done.

## ***About***

- Privacy Policy
- About WingSoft Farms

## ***Logout***

## IN TOP LEFT PANEL

- Management (in each list option to add category, like add farm or add partner)
  - Farm List

|                                                                              |        |                                                                                     |
|------------------------------------------------------------------------------|--------|-------------------------------------------------------------------------------------|
| <b>Deepa Paravalasu</b><br>KGF-ERD-001<br>Capacity: 4,800   Sq. Ft: 28,000   | Active |    |
| <b>Lakshmi Voipadi</b><br>KGF-ERD-002<br>Capacity: 5,500   Sq. Ft: 32,000    | Active |    |
| <b>Chinnappan Voipadi</b><br>KGF-ERD-003<br>Capacity: 4,800   Sq. Ft: 28,000 | Active |    |
| <b>Sumathi Voipadi</b><br>KGF-ERD-004<br>Capacity: 3,300   Sq. Ft: 20,000    | Active |    |
| <b>Mani Kanjikoil</b><br>KGF-ERD-005<br>Capacity: 4,300   Sq. Ft: 26,000     | Active |  |
| <b>Ravi Voipadi</b><br>KGF-ERD-006<br>Capacity: 4,200   Sq. Ft: 24,500       | Active |  |
| <b>Muthu Voipadi</b><br>KGF-ERD-007<br>Capacity: 3,800   Sq. Ft: 22,000      | Active |  |

when Farm List is clicked, the page like above should open, utilizing max space to show many farms in single screen with minimal Farm details. float button at the bottom to add farm.

ADD FARM fields- Farm Name, Farm Code, Birds Capacity, Sq. Ft, Location (i ll type), GPS Capture/ Map icon with whatsapp share button. Notes, below that, farmer and supervisor.

Inventory allocation is not working. What we do is purchase feed, medicine and

vaccine in bulk and store in office and allocate to each batch. so when allocation is done to a batch, its also considered as production expense of that batch, cost of the item is got from the purchase. allocation also reduces stock.

Expenses are of 3 types. Production expense, farmer expense and office expenses (categories given already). Production and farmer expenses are linked to batch. Office expenses separate.

Finance has 2 ledgers, cash and bank.

Now there is same menu for payment i make and i receive. So payments i make is Payment, received amounts are receipt.

In create sale page, under Pricing and settlement, give only 1 rate and option to edit later. Remove transport, commission, deduction and payment received. After rate, total amount be displayed. Then Payment status is either Paid or Credit. When paid, mode - cash or bank. If bank, select account. Remove sale status.

In add expense, select whether Production or Farmer or Office expense. When production or farmer expense selected, batch needs to be selected. (Where all batch comes, under it let farm name be displayed so we dont have to select farm name in different field.) And respective categories for the expense category be displayed.

For production and office expense, payment status comes. Payment status is either Paid or Credit. When paid, mode - cash or bank. If bank, select account. For farmer expense only amount is entered, which is added to batch. (When admin enters expense its automatically added as credit in batch, whereas when farmer added it need approval to add as credit else its just displayed in batch bit not as credit)

**IN ENTRIES PAGE**

The tiles are,

- Daily entry
- Inventory allocation (when category/item selected to allocate stock be displayed)
- Inventory Stock (stock displayed in simple way like u have given stock in reports)
- Expense Entry
- Sale Entry
- Payment Entry
- Receipt Entry

Move Inventory Ledger to reports. Remove other tiles not mentioned above

## **FINANCE PAGE**

1. In investment entry - remove type, payment status and description

Add

Invested by - where names under Owner alone displayed.

Payment method - cash or account.

When cash selected, it goes to cash in hand ledger.

When account selected, let me select which account.

2. In Add Purchase, Payment status is either Paid or Credit. When paid, mode - cash or bank. If bank, select account.

3. In create payment

Remove Batch, payment type and direction.

Add, payment mode. If cash, cash in hand ledger updated.

If account,lets select bank account.

If vendor payment, amount is debited from balance

Date, Vendor, amount, mode, bank selection(if bank mode), notes

4. In floating add button, give add receipt option.

Date, trader, amount, mode, bank selection(if bank mode), notes

REPORTS PAGE WILL PREPARE AND SEND,
